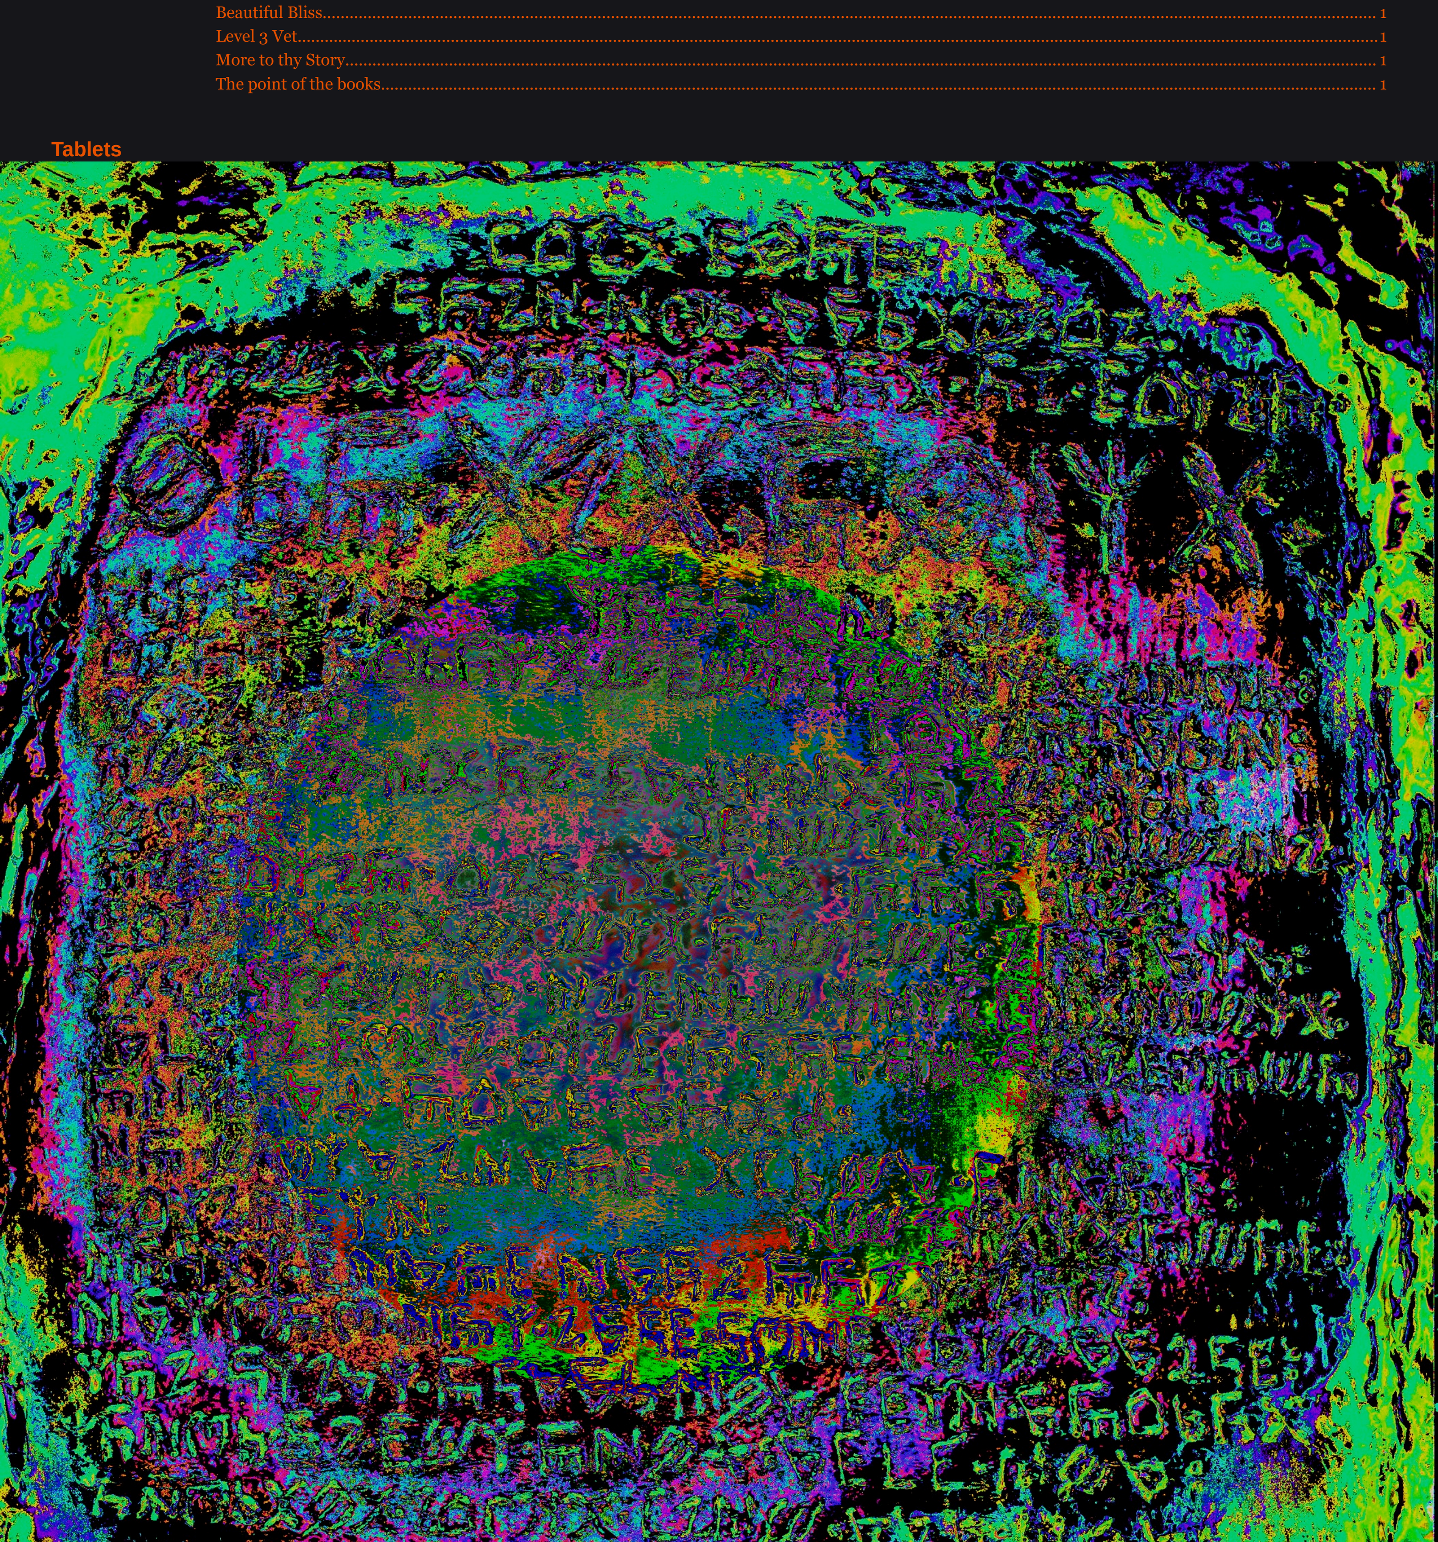
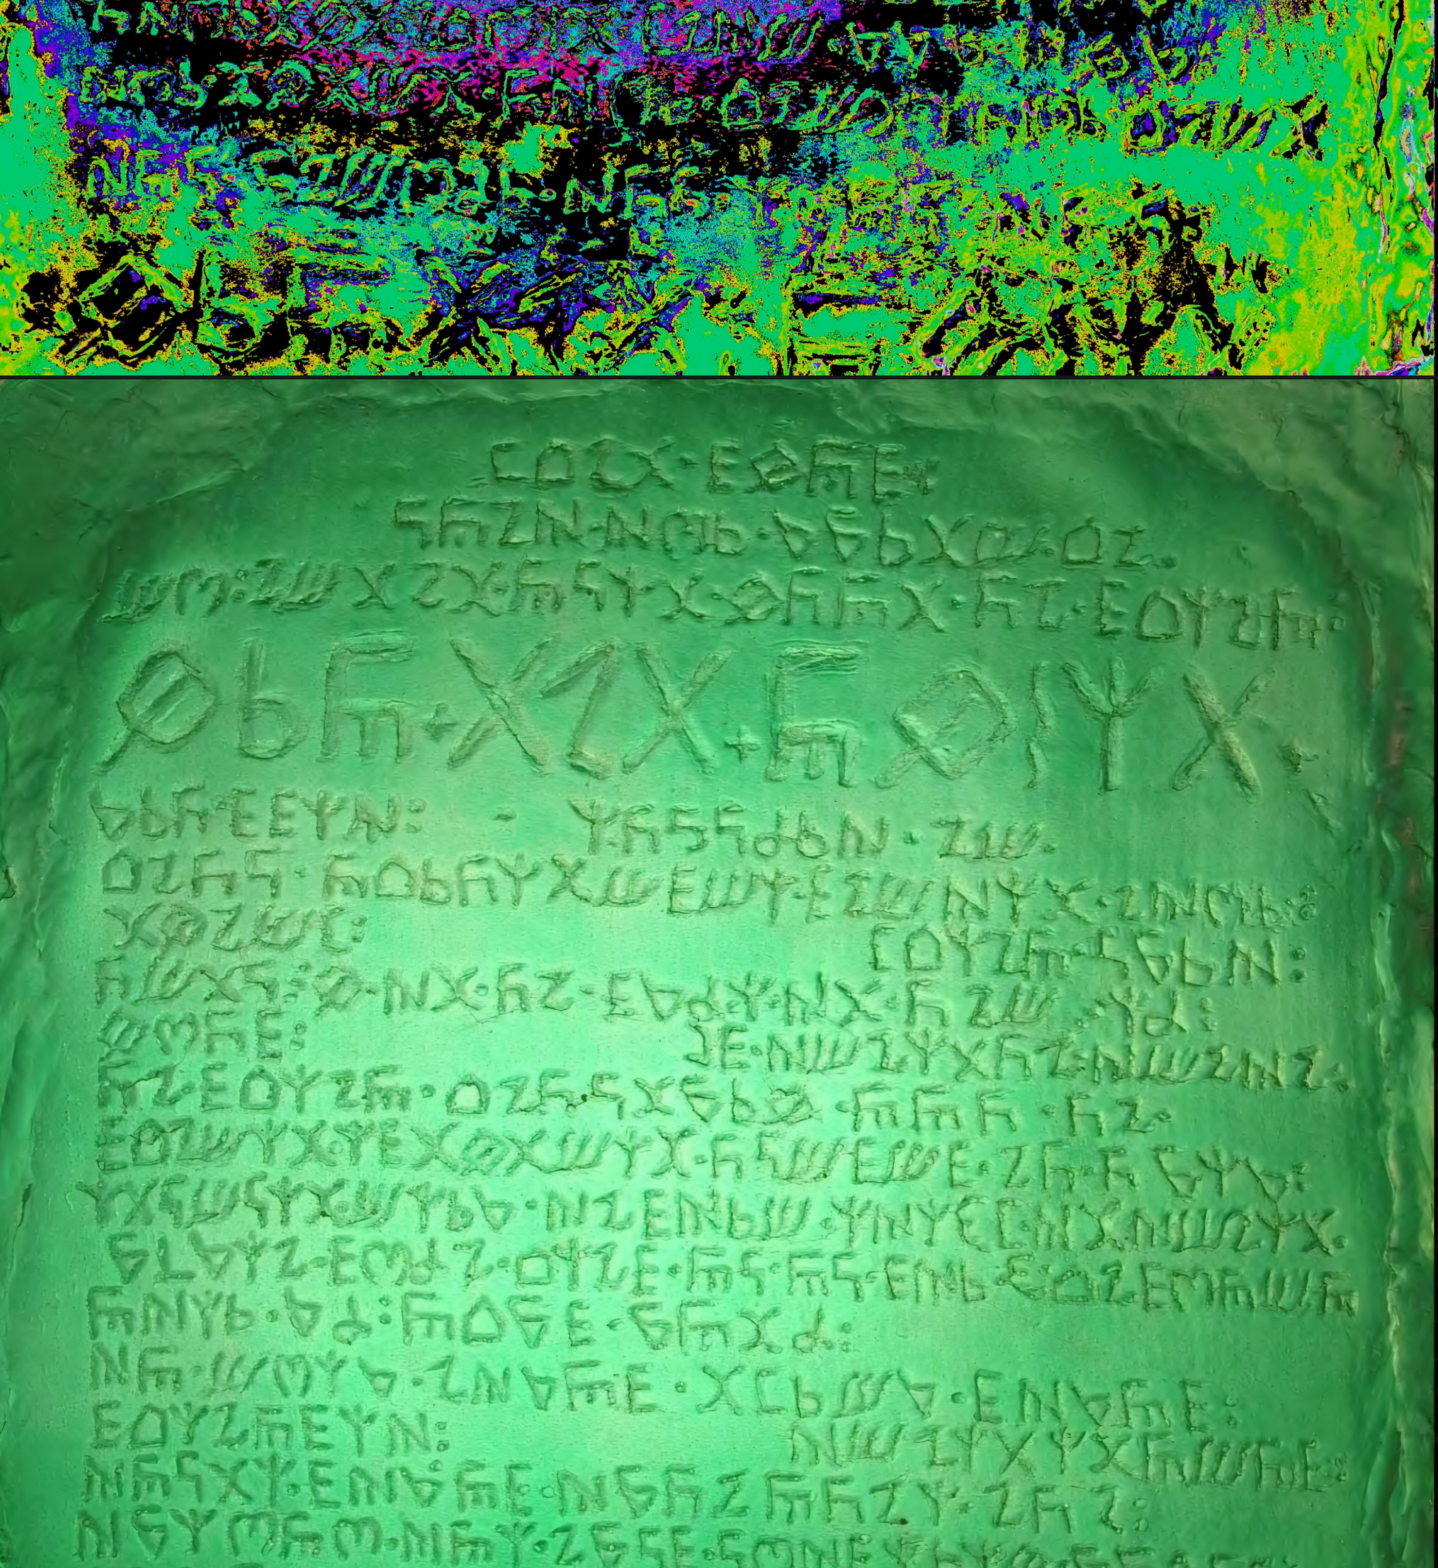
Tablets





I really like dont wanna keep doing this here, I just go insane if I dont write cos of all this, like I aint know what to do.... we just look over our books atm sometimes lol like the vibe moves on always here tho....

like my whole point again is medicine, the fact this happened, like when I was having fun with this, like all of this, is why like 1st of all the wisdom says must be excused the descending of the body into man ahahah like really tho & it aint been its stupid af like im still mad af if you dont help me when you could of here .... like if true you create this and then like blame me in a sense.... that aint fair or friendly at all....

we really again like just id rather not be here than to slave my life away like in all ways, their is no point also if people are evil here like just you can get drunk but not thc, like or shrooms shit is like you must be retarded in a sense if you asked me here....

& then like yeah idk we never feel good, like cos of whats actually happened, again, they aint want me to win I guess, either way all this been again like wtf do I do then here, and still nothing like even if true we could deny here lol like we just aint know what this is all about

but we do know what the tablets about here........... and thats it, like if you cant listen to the person who decoded this either way we did and explained it in a sense. like must be why thoth created it in the 1st place cos he knew....... like I said they worship thoth bcos hes in the coding of the simulation........ like he wasnt randomly like oh like nah they saw this and basically glyphs are the same thing as zooming into these things, like their little art works, lol, like energy in motion but still like shit is cool af tho .... and yah no1 cares ....

if true also you still aint understand what happened that day this was.... just dont know thats consciousness tho.... like just we aint feel good cos of not having our ADHD tablets..... like legit it is a reason why we are AncientXThoth here , like I said at this point..... theirs no other choice to go down with the plane or down with ship as the captain like we stay true to this all..... like weve followed our heart too......

the weird part again idk like just its something about the truth people love like in my mind idk like we could make version 2 right now lol like but youd have to again like the whole story of it, again, as if another planet started ours also, like we dont know what the truth is in that sense, even if this all true, nobody may know honest..... but theirs something about the truth..... like why would we solve it.........why would it show that shit like really here tho, as if solving it in a way they come back ahahah imagine , but its more of a personal truth as well....... like idk its twisted af, just its funny to solve it and nobody cares or listens here........... what can they do anyways but yeah idk... like in my mind just yah its like that to me, bcos of finding it this deep & even naming ourselfs ancientthoth take this for perspective, what if they had internet back in day and again names in consciousness could also mean that shit like your online names also .... never know ... but yeah seriously I just think again as if only thoth could solve it is that paradox, we saw the entity, like just idk seems like the only answer, cos every1 sees differently ahahhaha like it says it all, like when we heard it the 1st time like I was like hmmm we love thoth like hes just like us here ahahah =(

that idk if it does exist and it must right like idk we wanna hold that shit we deserve to cos of all this like we get to etch the tablet some more with thy intitals here or something..... why thy name at the top lol............ even that idk it is close tho.......

cos just it thats like thoth knew something and in todays world its like nobody cares...... like dont know..... but this is thy experience again like ....

I think its only right to say we got it right more than anybody like in all ways...... like if you saw thoth looking at you on your stomach and this all like their on the rod like how can I not share this, thats super like thats like having super powers tho legit like shit ...... just again idk you ask me its cos like I said when I saw the entity..... he was legit vibratating like smokey dense black space... a blackhole like he had a galaxy on his wrist....... like just idk when I do have these moments and flashback like idk nothing realer lmao like shit moved fast tho and through doors just into thy body...... and nothings happened life has sucked soo much here.....

that is the problem like in a way , just cant no 1 but thoth show you this in a way at this time like its been a year........ just thats whats even more fucked that nothing been like jeeze.....

like it is why weve made this even so like thoth would make his tablet, like shit is real... lol like just to believe it is one thing... to see it is another......

we losing our mind hahaha we already said it all tho.... like if it was me again like idc what you think, the dragon be king here.... like the answer..... lol ......

its 1125pm I wrote this after work started before no idea where to take it, we took 25mg seroquel instead of 50mg seroquel but we took 5mg melatonin also cause like legit that shit aint help me ever, like pft legit sensitive and my dose was like 20x this before on zyprexa.... wtf..... just idk thats wrong when their is nature here..... why we write, the whole world be wrong, like its when you aint got a friend , the child relys on the world here..... the soul of the world.....

but yeah like just idk.... like again I keep thinking its this, it aint ever stop we just avoided thinking about it here........... lol.... like I have no choice......

& again that is fked like but not really like again we so wise, like we think we being played rn like we aint trust shit, cause we know what we do and whats happened here, haha like again idk tho like if again like this actually being... would be like again as much energy as the entity, ... like again believe what you want right anything be possible in a sense...... like anything tho... can go whatever plane you want in a way....

lol...... like would be stupider to not think that, like we look at every angle...... just idk like I said that is wrong if true, maybe im wrong, but maybe it still idk like again got nothing else to believe in cause the numbers..... 1 article thats all we read tattoos and this happen to my mind...... and this is thy experience.... like idk lol.... its worth something more than this at end of day...........

and again just to think this, like idk wouldnt if it wasnt possible...... but again that is death like legit ...... like lol .... thats just again what we try to avoid until something actually is, lmao like idk , just yeah like we dont know, but the truth of this story is whats fucked, like what can this person believe in then...... lol.... like its all about parameters, but again thats what gateway states..... specific parameters to manifest a specific reality, and that it all comes from the other side.................... like so idk like just dont..... like we just always think still of both ppl I like, like we dont creep on any way ..... like cause that is again changing a state of quantum mechanics..... like .... opening doors can be dangerous here ahahah parameters..... really no joke and nothing here is free so fk you is how I feel .... just cos idk lol like cos me being in the open causes this & then again its like im blamed like pft instead of helping here is how it feels like if I was on Mars here.... its like your orbiting above and wont come scoop me up here... like iv been decaying away with nothing ...... like no sense of what to do on the earth...... lol...... =(

thats again to me what is like I just say it straight up in a way, like we know both sides here.... like just energy be waves I guess..... but yeah like having sex with a woman shit makes you fall in love, lmao like that shit happen with my ex here for real tho........... like just wtf.... like and thats how your born legit like a sick curse.... ahahah cause just that is the truth in a way..... you can do what you want with your life..... but yeah idk like again just theirs always highs & lows of any story....... like to avoid it cos again like we do be picky here .... like that old 21 savage song lol like music again shit aint like what inspired this all before...... like what a wasted opportunity but we aint dumb either.... like gotta be free here......

hahahah sometimes again we cant take everything for what its sold off as always like shit be funny since the day I ate shrooms in a way cant help it. like minds been opened........ like just idk it was thoths curse but a good one but not when you dont water thy flower of life here like pft, this shit is legit in my mind legendary af and its treated like its not or this keep happening cos I am being listened to cause & effect, or not but either way like we dont know... lol like and who so yeah like idk we getting sleepy here in thy mind rn

we used to tho again get to listen to all types of music at work, this job is ass, like the music that plays like pft im so annoyed like you aint know like im not joking their aint a point of being here at same time how would you feel like fml, but again the truth be the truth in all this like dont know what else to say lmao like that you can generate better ideas together anyways like 1 person can change shit like again we too wise but we gotta jump from the airplane sometime before its too late also here in life ahahah ....

too many parallels, fk you....

but yeah honest to god , we dont know how to live with ourselfs .... cos all this that we write like its thy thoughts, what dont you get here ahahahah .... ancientxthoth.............. for a good reason really...... chances...... all of it still and like idk what if it aint it, or nothing yet..... who knows but this how we playing here....... if their was any love wed place you in our mind but we dont ahahahah like not in these times

idk the fked up part like we are gonna trust the person who built the fucking pyramid here.... lmao like who knows again, chances...... but yeah like just idk like with that logic, thats how you win thy game here ahahaha just gotta follow your heart........ and in a fucked up way really like thats all it took..... lol..... like you can do what you want here..... like again forget that lyric, but wayne im just playing in the sand aha lifes a beach, lol but yeah or just again that song we liked castles in the sand, again was mac but a hendrix song , that paradox is weird I guess but who doesnt like him also .... lol..... but yeah cos the RS3 summer event tho thats what you had to do , its why we played it more while their and again like idk life sucks we are soo like dont know how to feel or what to do, atleast again with ADHD meds we could focus on our life here, but we cant, weve denied wanting to move up mad times..... cos im honest aint gonna do something & fail but yeah you never know like all this again like you werent their for me at my lowest here tf, lmao like really dont know whats happen like why my thoughts again like we told thee story............

like if life aint something amazing, then their is no point of it ahaha just honest again like how much we dwell here, just exit the game then like if only it was just different and like but yeah something should happen I dont get it like really dont here

just idk thats the fked up thing about music like its all a vibe then it aint ahahaha like the vibe moves..... like just idk we been here doing nothing for way to fucking long here............. like it just is darker than dark on everything.............. like that wtf, divine thing happens & then like you aint wanna help thee and share nature....

like just idk like again could easily do it but could do anything at same time, but just anything to not be in this position is whats fked like we dont even feel good to begin with here....

it is twisted in the way of if another human was having nightmares about life like would you cure them with a simple fungi here, like you say no... like thats funny cause its the answer.... like thoth didnt make the pyramid and leave a tablet here with it all engraved, like with shadows on the wall, cause it aint the truth.........?? again like nobody knows, but we know this much here..... and all we got is thoughts like just idk what to do here

we dont know if we gonna erase this stuff or just leave it, we dont know where to take this we been again weve said it all, what else is their to say ..... never is just the truth be.... and again like idk thats stupid af for not to trust ye thoughts esp when this happened so again just dont know here................................

even if I was wrong like it can only be something better in this sense ahaha like to not be here anymore like idk we aint again like its all cos the medicine paradox but it works like im pissed whats happened here, like what works should be given , like life be a hallucination or an illusion to begin with here .... like how dumb, 1 molecule away psilocybin , like just it changes how thy brain works....... in an relaxing way like you get again just when you come out of it, your like, pft this is nothing here, like we can chill rn ahaha like you come back better and im pissed legit idk cos in all of reality, that is all we want like thoth says in the tablets....... and doing so..... make the tablet writable like once you share your hearts lighter but it aint till then shit be heavy af on the scales says thy fingertips here .... lol

I just again to me, like idk just but then what is heaven, and it gotta be this vision, but its that like your free, lol.... =(, thatd be fucked if humans could fly ..... but I swear like never experience something like that for the 1st time again pft, we was like the bird flying away flapping our wings no jokes here why we showed it like that ahahah and yah fast fled back to body dont know what else to ssay it says its how we got this key here... lol...... I mean believe it or not this is the truth in totality........... to the tablets saying it also........ shit this shadow be like the underworld king like pft cant escape from him, like idk its weird just cos how precise again like we aint see nothing like it honest that someone expresses it also like I have that they flew like I showed, we come with graphics and not just a story, like spell binding of the eyes here, like we cant be...... jk thats all anyone ever is also but then again all that exists is most hidden like aint that twisted also..... pft game again without the observer, nothing exists is the fked truth lol.... nothing be free here lol...........

even as more of a like it cant be seen like iv shown is what my mind says but nobody questions why to me , even if it has been seen, ... like the tablets. idk like again like pft just again idk it is the answer...... either way art be in that way like what can you show me here is the question...... that expressed thy inner mind I guess ahaha mine be ufos ahahah jk like idk we dont obsess over anything we dont again like cos its all about parameters but to do this and nothing ever is , is more fked, like dont know how else to play here......

but IDK love that futuristic vibe also like just it can be cool lol like the way I present it..... aint nobody or many see it is thy problem, lol like just idk consciousness be weird, like all I got is me here ahaha......

I just think again to even writing like im saying here tho........... that is who thoth be, the writer, so I dont know what to think like as if your tryna grab the bits here off my rotating blackhole like it said like just anyone & everyone, like aha like to have this be, be here in life, these be my thoughts & how I created a barrier, like we dont know what else to do here.... like we aint even feel good, all this dumb shit happen, for the wrong reason wtf, you wanna smack some sense into somebody, feed them magic mushrooms, theyll think twice... lol..... we always have tho idk like thats what dictates somebodys trip to me, is the good demon or good mind here, cause the demon is all that bes, like lol, cos just yeah idk why we gotta live in these golden years of us or else it really aint happening or anything like the time has always been....right now lmao according to the light cones .... weve again like dont know what to think

like again tho here what has just entangled my mind, more than shrooms, more than ADHD or bipolar meds, like anything, is the entity tho ahahha like shit just like theirs more to this than just that being like lmao...... like all we done is felt worse and lost our mind more when we followed our heart tho like wtf...

just is just that, like we think this happen to us & nothing like nobody knows what happen to me , why should they care right like but this is what happen my story and it all parallels thoth.... so dont know what to tell ya........ like maybe it just is so, like the wisdom be right, we follow it, so the truth manifests in thy thoughts, but nowhere else like..................... its so fucked to think like yeah you really do only have thoughts, and ahahah like its that voice from the otherside tho ahahahah like and that is what thoth says like the master opens the doors for him cause hes pious ahahha like so yeah idk like just really what we have showed, aint no1 in my mind expressed it like this, like but its simple and the answer to it all

alls ik right now is we be like falling asleep tired and prob gonna lay down & not be able to sleep or some dumb shit, the morning here in like 2 seconds when I get to sleep it sucks so much like pft like thats life when you die here again w.e it really is, like just you wake up from a dream in thy entity above thee like just that is the only truth here to me...... like that bcos of gaming & that tho like just idk , but it is why since back then weve thought of life like this just that lol like prob alot of ppl say it but again like idk its the fked up part of it all like just we wont go down without a fight and if we do its cos of the emerald tablet curse like thy grave needs to say this ahaaha thoth... just yah idk like the world be mad weird and life sucks ....

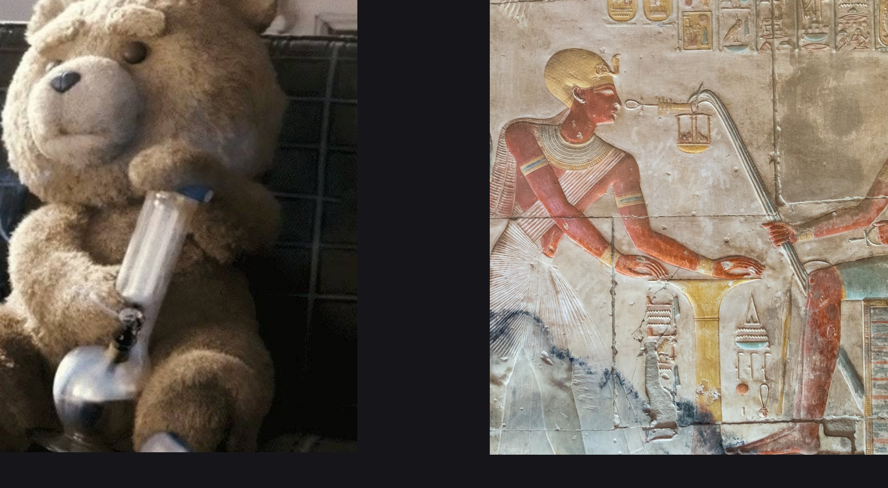
Beautiful Bliss

by Wale

Just the song of the morning of 8/31..... just we aint feel good ever here on everything...... cant express it any more than all this....... the total opposite of what we stand for here in a way..... cos it says Attention Deficit on the album, like the tablets... here.... like just again we are right w.e like done tried but theirs no other way to view it all, the whole song be nice but the 2nd verse or by cole be nice , I let you niggas see the light...

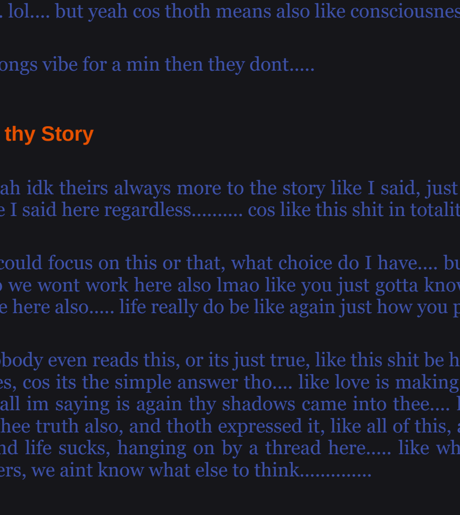
Level 3 Vet

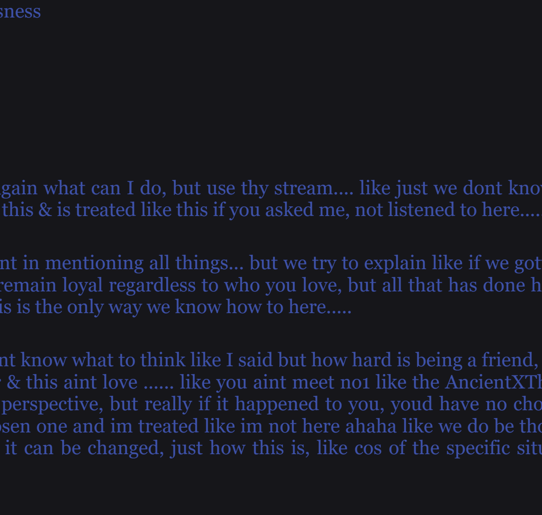
Guard ya body nigga, ahahah I know we use this word but its the lyrics like I said before tho nigga is like friend just to say like people do be like they dont think to me, like same thing as saying mate.... lol but yeah "Rounds by Chinx", idk just be fire, like a not so well known song, and hes like guard ya body, all my niggas come unconscious.... but yeah the stove part clockwise counterclock wise, like the ted laptop scene ahahah



just realized yah see what I mean tho he says 840 leave you sloppy nigga..... like its that 48 again tho it was just that time too 1048 like we keep it real and we treated like we can change this situation when we cant without a friend sharing...

Hahah all of that shit, how spongebob was in the ted movie, ripping the bong... like that Horus glyph.... lol



& yah level 3.... like you start as level 3 in runescape, so a level 3 vet would be a skiller, like look at thee accts thats what we loved the most, skilling versus combat... lol.... but yeah cos thoth means also like consciousness, thought consciousness

but idk songs vibe for a min then they dont.....

More to thy Story

I guess yah idk theirs always more to the story like I said, just entanglement like again what can I do, but use thy stream.... like just we dont know what to think like I said here regardless.......... cos like this shit in totality..... like who solves this & is treated like this if you asked me, not listened to here......

Like we could focus on this or that, what choice do I have.... but yeah theirs no point in mentioning all things... but we try to explain like if we gotta explain this deep we wont work here also lmao like you just gotta know how life goes... & remain loyal regardless to who you love, but all that has done has proven otherwise here also..... life really do be like again just how you playing ahaha like this is the only way we know how to here.....

fact is nobody even reads this, or its just true, like this shit be happening like we dont know what to think like I said but how hard is being a friend, breaks all paradoxes, cos its the simple answer tho.... like love is making someone feel better & this aint love ...... like you aint meet no1 like the AncientXThoth here, like shit all im saying is again thy shadows came into thee.... lol... fun to use that perspective, but really if it happened to you, youd have no choice but to express thee truth also, and thoth expressed it, like all of this, as if really.... the chosen one and im treated like im not here ahaha like we do be tho... we got wings, and life sucks, hanging on by a thread here..... like when the truth is, like it can be changed, just how this is, like cos of the specific situation the parameters, we aint know what else to think.............

we just wanna again feel comfortable again here.... & we aint..... like how can you expect love, if your other isnt comfortable...... like that we aint know where life be pulling us here.....

that ya any wise person would already understand this is how life bes, like your always basically gonna have to interact with other humans here.... like that how consciousness works tho is like that, that again we using that fire to say the least... of the stream.... but thats all we can do.... like if you aint a friend, whats the pt of anything, doesnt make thee want ye more just less everyday like cos you had a million days to just make this be in my mind... but again we aint know, all we know is we got thee mind & this thy story lol?

we feel like again just weve already told our side we cant keep doing this but we dont know what to do like if it was listened to again like we been screwed over in every single way here, when we the one to see the tablet like this...... like just we aint lieing, you can lie here, but when you get weighed at death you will see what I mean here.... the shadow so potent he be like we know we right like you cant outplay me here, when I created all things lol....... just yeah like again w.e , nothing I can do but suffer here tbh and that aint what alchemy is

we just expect it to be if its it, like thats how life works here..... like just again theirs no way all this be true and these be my thoughts & it aint true like just something here.... so w.e like we know we be right, we cant do anything to change this if a friend dont share is the actual truth.... like it aint being a friend if you aint their when its needed here, we already done paved this path since our life began, like what can we do but follow through like we do & the other side aint ever appear here....

The point of the books

is to just charge matter, a sense into being, like the tablet, the book tells thy story I guess... and each one sends a different algorithm of consciousess out... a piece of thy mind.... its just again this is totally wrong like the truth be the truth here... like all you had to do was be a friend... imagine that...
